

# Open Access Statement

"Costruzioni Metalliche" is committed to the open exchange of academic research and promotes access to scientific knowledge in the field of civil engineering and architecture. Below are the key policies regarding open access and licensing for published content in the journal.

## 1. Open Access Policy

- **Accessibility of Articles:** Articles published in "Costruzioni Metalliche" are available to readers without subscription or access fees. This allows the global academic and professional community to freely access research findings.
- **Hybrid Model Availability:** "Costruzioni Metalliche" offers a hybrid open access model, whereby authors can choose to publish their articles as open access. There are no fees for standard submissions, and open access fees can be arranged directly with the authors upon request.
- **Commitment to Knowledge Sharing:** By supporting open access, the journal aims to foster collaboration and the advancement of research in steel structures, ensuring that research outcomes are widely disseminated and accessible.

## 2. Licensing and Copyright

- **Author Licensing Options:** Authors publishing open access articles may choose from a range of Creative Commons licenses (e.g., CC BY, CC BY-NC) that specify the terms under which their work can be shared and reused.
- **Copyright Assignment:** Authors retain certain rights to their work, depending on the selected license, while also granting "Costruzioni Metalliche" a publishing license. This permits the journal to distribute, archive, and promote the work.
- **Reuse of Content:** For open access articles, permitted third-party reuse is defined by the license chosen by the author. The journal encourages sharing under licenses that support broad, non-commercial reuse, while maintaining attribution requirements.

## 3. Funding and Open Access Fees

- **Article Processing Charges (APCs):** To support open access options, "Costruzioni Metalliche" may require authors to pay an Article Processing Charge (APC) for their work to be published as open access. This fee helps cover publication costs, including editorial handling and online hosting. These open access fees are flexible and can be negotiated with authors on a case-by-case basis.
- **Waiver Policy:** The journal recognizes the financial constraints some authors may face and offers waivers or discounts on APCs in specific cases, such as for authors from low-income countries or for research funded by certain grants.

## 4. Archiving and Long-term Access

- **Digital Preservation:** "Costruzioni Metalliche" is dedicated to preserving published content for the long term. The journal utilizes digital archiving services to ensure that all articles, including open access content, are stored securely and remain accessible over time.

- **Self-Archiving Rights:** Authors are allowed to deposit a preprint or the final published version of their work in institutional or subject-specific repositories, in accordance with the chosen open access license.

## **5. Compliance with Funding Bodies**

- **Funder Open Access Requirements:** "Costruzioni Metalliche" works to comply with open access mandates from major research funders and institutions. Authors are encouraged to review funder policies to ensure compatibility with their chosen license and the journal's open access options.
